

# PRODUCT RANGE

eco friendly organic garden products

## Pest & Disease Control

ATTRACTS GOOD BUGS INTO YOUR GARDEN

### eco-oil

is a registered organic miticide/insecticide spray made from Australian grown plant oils and botanical extracts. eco-oil controls a broad range of insects, including scale, mites, aphids, whitefly and leafminer. **New HIPPO Enhanced formulation also attracts beneficial insects into your garden like ladybeetles, lacewings and hoverflies.**

There is less risk of burning foliage with eco-oil than with white oil and other mineral oil sprays, and there is no withholding period for edible crops. eco-oil is an excellent wetter/sticker for all foliar garden sprays when used at half the dose rate. **Available in 250ml, 500ml and 1L concentrate packs and a 750ml Ready-To-Use pack.**

### eco-neem

is a registered organic botanical insecticide that contains highly stable and effective extracts from the neem tree. eco-neem controls a broad range of sucking and chewing insects including curl grubs, caterpillars, aphids, mites, whitefly, lawn armyworm, fungus gnats, citrus leafminer and grasshoppers. Around the world it is also registered for thrips, mealybugs, scale, lace bugs and more. Safe for bees, ladybeetles and other beneficial insects.

**Available in 100ml and 250ml concentrate packs.**

### eco-naturalure fruit fly bait concentrate

is a registered organic fruit fly control bait spray for both male and female flies. It combines specific food-based attractants, which target only fruit flies, and a bacteria-derived insecticide called spinosad. Application is easy – it's a spot spray, not whole-tree application. No withholding period. Controls both Queensland and Mediterranean fruit flies.

**Available in 150ml, 500ml and 1L concentrate packs.**

### eco-lure male fruit fly trap & replacement wick

the Queensland fruit fly trap acts as a monitoring device for fruit fly. It attracts and kills only male Queensland fruit fly, NOT females. When placed amongst the crop at flowering, male fruit fly are attracted to the trap, and killed once they touch the wick inside.

Once a male fruit fly is found in the trap, it is time to spray eco-naturalure fruit fly bait concentrate. Do this weekly until harvest. Replace the wick every three months.

**Not available in WA, SA or Tas.**

## eco-CLM trap

is a registered organic trap for citrus leafminer protection. It uses pheromones to attract and catch the male citrus leafminer in the sticky trap. Contains no insecticide and is safe for beneficial insects like bees and ladybeetles. Lasts up to 3 months.

**Available as a complete unit containing one trap and pheromone lure.**

## eco-fungicide

is a registered organic fungicide made from specially formulated food-grade potassium bicarbonate. It controls common fungal problems like Powdery Mildew, Black Spot and Rust in two ways. It rapidly attacks and destroys existing infections and then leaves an invisible coating to prevent new outbreaks. No withholding period when used on edible plants. Apply with eco-oil for superior results.

**Available in a 500g concentrate pack and a 750ml Ready-To-Use pack.**

## eco-rose

is a registered organic fungicide for the control of Powdery Mildew, Black Spot and Rust. Made from specially formulated food-grade potassium bicarbonate it's the perfect fungicide for use on roses. Apply with eco-oil for superior results.

**Available in a 500g concentrate pack.**

## Plant Growth

## eco-aminogro

is a registered organic plant fertiliser made from a unique blend of amino acids, vitamins and essential bio-nutrients – perfect for all plants including natives, ornamentals, fruit and vegetables. eco-aminogro produces better growth, bigger flowers and more fruit. Combine with eco-seaweed for amazing results.

**Available in 500ml and 1L concentrate packs.**

## eco-seaweed

is a registered organic powdered seaweed extract. eco-seaweed increases plant growth, flowering and fruiting, enhances root development and reduces plant stress. Unlike some liquid formulations, eco-seaweed contains no nasty preservatives, is 100% soluble and is highly concentrated. Use just one heaped teaspoon per 9L watering can!

**Available in 100g and 400g powdered concentrate packs.**

## Soil Improvers

### eco-flo gypsum

35% Calcium, 25% Sulphur, Seaweed extract

is a registered organic liquid claybreaker and soil improver. *eco-flo* gypsum encourages clay particles to bond together improving soil drainage and aeration. *eco-flo* gypsum also helps flush out salt build up in soils caused by regular grey water use and swimming pool splash. *eco-flo* gypsum is the perfect way to add valuable calcium to your soil without changing the pH.

Particle sizes are much smaller than regular powdered gypsum which means *eco-flo* gypsum is extremely concentrated and is more rapidly available to plants for faster results. 500ml concentrate is equal to 20kg of powdered gypsum. Enriched with seaweed extract to enhance results.

**Available in a 500ml concentrate and 2L hose-on.**

### eco-flo lime

48% Calcium, Seaweed extract

is a registered organic liquid lime solution that increases soil pH and provides valuable calcium to plants ensuring better plant health and fruit production. Particle sizes are much smaller than regular powdered lime which means *eco-flo* lime is extremely concentrated and is more rapidly available to plants for faster results. 500ml concentrate is equal to 20kg of powdered lime. Enriched with seaweed extract to enhance results.

**Available in a 500ml concentrate and 2L hose-on.**

### eco-flo dolomite

35% Calcium, 12% Magnesium, Seaweed extract

is a registered organic liquid dolomite solution that increases soil pH and provides valuable calcium and magnesium to plants ensuring better plant health and fruit production. Particle sizes are much smaller than regular powdered dolomite which means *eco-flo* dolomite is extremely concentrated and is more rapidly available to plants for faster results. 500ml concentrate is equal to 20kg of powdered dolomite. Enriched with seaweed extract to enhance results.

**Available in a 500ml concentrate and 2L hose-on.**

## Moisture Management

### eco-hydrate

contains special water attracting sugars called humectants that reduce the need for watering by up to 50%. Also present are seaweed extracts, plant growth stimulants and a soil wetter to reduce plant stress and improve water penetration. Perfect for pot plants, veggie patches, lawns, seedlings and new plantings. Safe for natives. 100% biodegradable.

**Available as a 500ml concentrate and 2L hose-on.**

## Garden Accessories

### eco360° sprayer & nozzle

with its unique rotating nozzle the eco360° makes spraying the underside of foliage easy. The 1L sprayer bottle also has a helpful product-use table, enabling easier use of our eco-products. The eco360° provides better spray coverage so that pests and disease have no hiding places.

**Available as a 1L spray bottle & Nozzle Only pack.**

## The Garden Guardians

The Garden Guardians is a fascinating book containing information on pests as well as garden friendly insects, organic gardening and the eco-organic garden range. The detailed information and insect images provided will help gardeners identify and attract beneficial insects into their backyards and look at pest control in a different light. **Now in its 4th edition!**

## Good bugs for your garden

**Backyard Buddies is a range of live beneficial insects, consisting of:**

- Gracey, a green lacewing who eats aphids, mites, juvenile whitefly, moth eggs and small caterpillars.
- Pete, a predatory mite who eats two spotted mite.
- Linda, a ladybeetle whose larvae devour mealybug and some scale.
- Luke, another type of ladybeetle whose larvae are specialists in munching on soft scale.
- Walter, a wasp who helps reduce domestic and stable fly numbers.

**Purchase and release in your garden to control pests the natural way. Reduce your need for insecticide sprays!**

## Backyard Buddies Bed & Breakfast

is a seed mix that combines a variety of perennial and annual flowering plants and herbs. These plants provide shelter, as well as attract and maintain beneficial insect populations via their nectar. Encourage your released Backyard Buddies and their native friends to stay in your garden. The seed mix can be put into large tubs or planted in the ground.

**Available in a 8g pack.**

## Stockists
